Applications

- Bundling and inter-layer insulation in high temperature transformers and large DC mining and traction motors
- Core and interlayer insulation in transformer construction
- End taping of core coils
- Taping of unsupported coils

Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 18°C to 24°C, with a relative humidity of 40% to 50%. When using an adhesive tape stored below 18°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
