

Saint-Gobain / h-old® 70AC

Saint-Gobain / h-old® 70AC is a polyimide film coated on one side with an aggressive solvent-resistance acrylic adhesive that offers superior adhesion levels to most surfaces. Designed for high temperature electrical applications where a thin backing combined with excellent dielectrical properties are required.

Nominal Values

Manufacturer	Saint-Gobain / h-old®
Backing	Polyimide Film
Backing Thickness	0,025 mm
Adhesive Type	Acrylic
Total Thickness	0,060 mm
Insulation Class	F 155°C (DIN EN 60085, OANZ2 & OANZ8)
Color	Brown (79), Green (37), Green (37) by request -not UL-listed
Adhesion to Steel	10,00 N/25 mm
Tensile Strength	100,00 N/25 mm
Elongation at Break	35%
Breakdown Voltage	6000 V
Electrolytic Corrosion	1
Rolling Ball Tack	< 10 cm
Temperature Resistance	+180°C, (short-term)
UL-File #	E178430
Length	33 m, other lengths upon request
Width	6 mm, 9 mm, 12 mm, 15 mm, 19 mm, 25 mm, 30 mm, 38 mm, 50 mm, 640 mm, other widths upon request
Storage Life	The material can be stored at room temperature for at least 12 months.
Effective	29 March 2021

Saint-Gobain / h-old® 70AC

Applications

- Insulation of bobbins, transformers, motors, capacitors, wire harnesses
- Cable industry

Benefits

- High temperature resistance
- Thin and conformable
- Good chemical and solvent resistance

Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 15°C to 24°C, with a relative humidity of 50% +/- 30%. When using an adhesive tape stored below 15°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
