

Saint-Gobain / h-old® H220

Saint-Gobain / h-old® H220 is a Kapton® film coated on both sides with high quality pressure sensitive silicone adhesive and protected by fluorosiliconized polyester liner. Designed for high temperature electrical and electronics applications where a thin, conformable backing combined with excellent dielectrical properties are required. NuClear (00) radiations resistant. Flame retardant (UL 510).

Nominal Values

Backing	Kapton® Film, Polyimide Film, double-sided
Backing Thickness	0,025 mm
Adhesive Type	Silicone
Total Thickness	0,100 mm
Insulation Class	H 180°C (DIN EN 60085, OANZ2 & OANZ8)
Color	Brown (79)
Liner	Fluorosiliconized Polyester
Adhesion to Steel	6,75 N/25 mm
Tensile Strength	112,50 N/25 mm
Elongation at Break	35%
Dielectric Strength	7200 V
Electrolytic Corrosion	1
Rolling Ball Tack	< 10 cm
Temperature Resistance	+260°C, (short-term)
Length	33 m, other lengths upon request
Width	6 mm, 9 mm, 12 mm, 15 mm, 19 mm, 25 mm, 30 mm, 38 mm, 50 mm, 1000 mm, other widths upon request
Storage Life	The material can be stored at room temperature for at least 6 months.
Effective	29 March 2021

Saint-Gobain / h-old® H220

Applications

- Printed circuits board assembly
- Flexible circuits

Benefits

- Very high temperature resistance
- Good chemical and solvent resistance

Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 15°C to 24°C, with a relative humidity of 50% +/- 30%. When using an adhesive tape stored below 15°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
