Saint-Gobain / h-old® RX50

Applications

- Phase insulation of electrical motors, generators, etc.
- Outer wrapping and anchoring of dry-type and cast-resin transformers, coils, etc

Benefits

- Very good thermal resistance and outstanding breakdown voltage
- High initial adhesion
- Good chemical resistance when thermoset

Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 15°C to 24°C, with a relative humidity of 50% +/- 30%. When using an adhesive tape stored below 15°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
