

## tesa® 58373

tesa® 58373 is a transparent, 80µm double-sided, flame-retardant PET tape. It has especially been developed for power battery demanding mounting, lamination and converting applications with a flame retardant property as an added value. Due to its non-flammability it is particularly designed to meet power battery automobile requirements.

### Nominal Values

<b>Backing</b>	PET Film
<b>Backing Thickness</b>	0,069 mm
<b>Adhesive Type</b>	flame-retardant, Acrylic
<b>Total Thickness</b>	0,080 mm
<b>Color</b>	Clear (00)
<b>Liner</b>	White, siliconized Paper, with red logo
<b>Adhesion to Steel</b>	20,50 N/25 mm
<b>Temperature Resistance</b>	-40°C to +125°C
<b>Length</b>	100 m, other lengths upon request
<b>Width</b>	6 mm, 9 mm, 12 mm, 15 mm, 19 mm, 25 mm, 30 mm, 38 mm, 50 mm, 1250 mm, other widths upon request
<b>Storage Life</b>	The material can be stored at room temperature for at least 12 months.
<b>Effective</b>	09 August 2021

## tesa® 58373

### Applications

- Applied in power battery or any lamination application (heating plate mounting, etc) where additional flame retardant properties are required

### Benefits

- Flame retardant per UL94 VTM-0 level
- Excellent initial bonding to polar substrate (PI, Al, etc)
- Good die cutting ability for converting process
- Halogen-free

### Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 15°C to 24°C, with a relative humidity of 50% +/- 30%. When using an adhesive tape stored below 15°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
