

## tesa®ACXplus 7054

tesa® ACXplus 7054 is a highly transparent acrylic adhesive tape which is especially suitable for structural and permanent bonding of glass or transparent plastics. Different thermal expansions of the materials to be bonded are very well compensated by the viscoelastic acrylate core. The product has a high initial and final adhesive strength.

### Nominal Values

1

## tesa®ACXplus 7054

### Applications

- Permanent attachment of transparent and translucent materials
- Sign and display production
- Assembly of glass partitions
- Attachment of decorative glass panels

### Benefits

- Different thermal expansions of the materials to be bonded are very well compensated by the viscoelastic acrylate core. The product has a high initial and final adhesive strength

### Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 19°C to 21°C, with a relative humidity of 50%. When using an adhesive tape stored below 19°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
