

Technical Product Data Sheet

volzAcrylicFoam 74025 PV1

volzAcrylicFoam 74025 PV1 is based on a clear solid acrylic adhesive. It is stable in both high and low temperatures and is strong under UV. volzAcrylicFoam 74025 PV1 has a high heat, chemical and moisture resistance. Its excellent holding power withstands various weights in many types of environments.

We provide the technical data of our products to the best of our knowledge, but without obligation. Due to the wide range of material and environmental influences, we recommend a suitability test on original products prior to use. Please also note the

Technical Product Data Sheet

volzAcrylicFoam 74025 PV1

Applications

- Metal, glass, high surface energy plastics
- Joining clear materials
- Signs and nameplates
- Decoration panels

Benefits

- No VOC, and environmentally friendly
- Strong under UV
- Excellent holding power
- Stable in low and high temperature Heat, chemical and moisture resistant

Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 15°C to 24°C, with a relative humidity of 50% +/- 30%. When using an adhesive tape stored below 15°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
