

# volzDispenser 161-6120

volzDispenser 161-6120 is an industrial tape dispenser with electric motor for cutting high-adhesion adhesive tapes, metal foils, cover foils, tubes and other materials to length. Robust stainless steel housing with integrated roller suspension for solid use in industrial applications. Efficient guillotine cut with finger protection and switch-off contact. The device is optionally expandable and can be adapted to special applications.

## Nominal Values

|                               |  |
|-------------------------------|--|
| <b>Length Calibration</b>     | Control Panel  |
| <b>Power Consumption</b>      | 100 W  |
| <b>Tape Width</b>             | 20 mm – 120 mm   |
| <b>Tape Length</b>            | 20 mm – 999 mm   |
| <b>Max. Roll Diameter</b>     | Innendurchmesser 75 mm (optional anpassbar), Außendurchmesser bis zu 300 mm (optional anpassbar) |
| <b>Type of Rolls</b>          | High-adhesion adhesive tapes, metal foils, cover foils, tubes and other materials                |
| <b>Required Space (LxWxH)</b> | 270 mm x 325 mm x 335 mm   |
| <b>Weight</b>                 | 12,00 kg   |
| <b>Mode</b>                   | Automatic  |
| <b>Type</b>                   | Strip Dispenser  |
| <b>Effective</b>              | 18 March 2024  |

## volzDispenser 161-6120

### Applications

- For cutting high-adhesion adhesive tapes, metal foils, cover foils, tubes and other materials to length
- Intended for use in industrial applications
- As an option, the device can be expanded and adapted to special applications

### Benefits

- Robust stainless steel housing with integrated roller suspension
- Efficient guillotine cut
- With finger guard and switch-off contact
- Optionally expandable
