volzDispenser 161-6120

volzDispenser 161-6120 is an industrial tape dispenser with electric motor for cutting high-adhesion adhesive tapes, metal foils, cover foils, tubes and other materials to length. Robust stainless steel housing with integrated roller suspension for solid use in industrial applications. Efficient guillotine cut with finger protection and switch-off contact. The device is optionally expandable and can be adapted to special applications.

Nominal Values

Length Calibration	Control Panel
Power Consumption	100 W
Tape Width	20 mm – 120 mm
Tape Length	20 mm – 999 mm
Max. Roll Diameter	Innendurchmesser 75 mm (optional anpassbar), Außendurchmesser bis zu 300 mm (optional anpassbar)
Type of Rolls	High-adhesion adhesive tapes, metal foils, cover foils, tubes and other materials
Required Space (LxWxH)	270 mm x 325 mm x 335 mm
Weight	12,00 kg
Mode	Automatic
Type	Strip Dispenser
Effective	18 March 2024

volzDispenser 161-6120

Applications

- For cutting high-adhesion adhesive tapes, metal foils, cover foils, tubes and other materials to length
- Intended for use in industrial applications
- As an option, the device can be expanded and adapted to special applications

Benefits

- Robust stainless steel housing with integrated roller suspension
- Efficient guillotine cut
- With finger guard and switch-off contact
- Optionally expandable
