

## volzElektro 1018 PV4

volzElektro 1018 PV4 is a Kapton® CR Film Electrical Tape (Corona resistant) manufactured from Kapton® film with a high-performing, thermosetting, silicone adhesive. volzElektro 1018 PV4 can protect gold contacts of PCB during wave soldering and the hot air leveling process. It is also designed for insulating coil at high temperatures as well as for products like generators, capacitors, and transformers. volzElektro 1018 PV4 has UL-registration under # E338128.

### Nominal Values

<b>Backing</b>	Kapton®, CR (Corona resistant), Polyimide Film
<b>Backing Thickness</b>	0,025 mm
<b>Adhesive Type</b>	Silicone, thermosetting
<b>Total Thickness</b>	0,064 mm
<b>Insulation Class</b>	N 200°C (DIN EN 60085 & OANZ2), C (OANZ8)
<b>Color</b>	Amber (00)
<b>Adhesion to Steel</b>	5,90 N/25 mm
<b>Tensile Strength</b>	137,00 N/25 mm
<b>Elongation at Break</b>	80%
<b>Dielectric Strength</b>	7000 V
<b>Temperature Resistance</b>	-73°C to +260°C
<b>UL-File #</b>	E338128
<b>Length</b>	33 m, other lengths upon request
<b>Width</b>	6 mm, 9 mm, 12 mm, 15 mm, 19 mm, 25 mm, 30 mm, 38 mm, 50 mm, 495 mm, other widths upon request
<b>Storage Life</b>	The material can be stored at room temperature for at least 12 months.
<b>Effective</b>	08 April 2024

## volzElektro 1018 PV4

### Applications

- Veneering for high temperatures
- Bundling and fixing of components (thermal switches) exposed to high temperatures
- Electrical insulation of coils, transformers, conductors, and cables for class N applications (200°C)
- Veneering of PCB gold contacts and protection of plug contacts and switches during soldering

### Benefits

- Good resistance to most alcohols, esters, ketones and oils
- Clean, residue-free removal in one piece after exposure to high temperatures
- High-strength backing provides superior puncture, tear and abrasion resistance
- Chemical resistant
- Excellent thin electrical insulation
- Flame retardant
- Temperature resistance: 200°C continuous - thermal class N.

### Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 15°C to 24°C, with a relative humidity of 50% +/- 30%. When using an adhesive tape stored below 15°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
