Applications

- Masking applications in high temperature areas
- General purpose masking tape for powder coating applications

Benefits

- High temperature silicone adhesive that withstands 180°C long term
- Resists baking temperatures up to 200°C up to 20 minutes
- Removes cleanly after use

Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 15°C to 24°C, with a relative humidity of 50% +/- 30%. When using an adhesive tape stored below 15°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
