volzElektro 6215 PV2 is a green translucent, high temperature resistant masking tape with a polyester carrier and a silicone adhesive. It is used for various applications, especially for masking in powder coating processes or bonding and splicing applications of non-polar material. The tape enables sharp paint edges and provides excellent paint anchorage. Its silicone adhesive system makes the masking tape heat-resistant. The high-temperature adhesive tape is characterized by simple application and easy, residue-free removal in one piece.
