

## volzFix 11965

volzFix 11965 is a double-sided, self-adhesive tape consisting PET-Film carrier and a modified-solvent, acrylic adhesive. It is characterized by a very good adhesion and very high temperature resistance and is also suitable for difficult applications. The tape has a good UV resistance and is compatible with other materials.

### Nominal Values

### Applications

- Used as light shield for LCDs, TFTs and displays
- Bonding mobile phone's LCD panel to BLU (Back Light Unit), so as to reflect the light from the BLU and enhance the brightness of the LCD

### Benefits

- Very strong adhesion and holding power
- It can be applied to various surfaces
- Very good surface conformity
- It can be used on irregular and rough surfaces
- Very good light shielding properties and heat resistance

### Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 15°C to 24°C, with a relative humidity of 50% +/- 30%. When using an adhesive tape stored below 15°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
