### Applications

- Widely used in the membrane switch and electrical industry (e.g. smart phones)
- Modular construction
- Production of corrugated cardboard and paper, and treated cardboard, paper foils, and metal plates
- Mounting and lamination of various insulating and foamed materials
- Applications where high transparency is required
- Good for foam lamination

### Benefits

- Good tack, very good UV ageing resistance, very good humidity resistance
- Good resistance to chemicals, good softener resistance
- Very aggressive adhesive with high adhesive strength even at high and low temperatures
- Very good converting performance because of a stable PET carrier and reduced adhesive mass flow

### Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 15°C to 24°C, with a relative humidity of 50% +/- 30%. When using an adhesive tape stored below 15°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
