### Applications

- Widely applied in membrane switch industries and electronic industries, e.g. mobile phone
- Modular assembly, LCD cushion and reflective film fixation, etc.
- Applications where thin and high transparency are required

### Benefits

- Very thin and transparent, with good adhesion
- Excellent resistant to moisture and plasticizers, which works well in wet environment
- Allows secure bonding to high surface substrates
- Short-term holding of weight is possible

### Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 15°C to 24°C, with a relative humidity of 50% +/- 30%. When using an adhesive tape stored below 15°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
