

volzFix 9082 PV2

volzFix 9082 PV2 is a double-sided adhesive tape with different adhesives on each side. One side has a solvent-free, acrylic adhesive which is based on aqueous dispersions. The adhesive has a low tack and an peel adhesion that increases moderately with the bonding time. Due to its highly cohesive properties, it can be removed from most substrates without leaving a residue. The other side of the tape has a solvent-free, modified acrylic adhesive, also based on aqueous dispersions. It shows a very good tack combined with a very high adhesive-strength, even on difficult surfaces such as foams and PE or PP films.

Nominal Values

Backing	PET Film
Backing Thickness	0,012 mm
Adhesive Type	modified, Dispersion Acrylic, solvent free, Transparent
Total Thickness	0,110 mm, (± 10%)
Color	Clear (00)
Liner	White, siliconized Paper
Adhesion to Steel	≥ 5,00 N/25 mm
Temperature Resistance	-40°C to +90°C
Length	50 m, Other lengths and spools upon request
Width	6 mm, 9 mm, 12 mm, 15 mm, 19 mm, 25 mm, 30 mm, 38 mm, 50 mm, other widths upon request
Storage Life	The material can be stored at room temperature for at least 12 months.
Effective	21 November 2022

volzFix 9082 PV2

Applications

- Bonding with resumption function
- Industrial process aids
- Object renovations in event technology
- Exhibition construction and carpet adhesion Object renovations

Benefits

- Open side has permanent adhesion
- Closed side is removable

Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 15°C to 24°C, with a relative humidity of 50% +/- 30%. When using an adhesive tape stored below 15°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
