

## volzFix 9082 PV2

volzFix 9082 PV2 is a double-sided adhesive tape with different adhesives on each side. One side has a solvent-free acrylic adhesive which is based on aqueous dispersions. The adhesive has a low tack and an peel adhesion that increases moderately with the bonding time. Due to its highly cohesive properties, it can be removed from most substrates without leaving a residue. The other side of the tape has a solvent-free, modified acrylic adhesive, also based on aqueous dispersions. It shows a very good tack combined with a very high adhesive-strength, even on difficult surfaces such as foams and PE or PP films.

### Nominal Values

<b>Manufacturer</b>	VOLZ®
<b>Backing</b>	PET Film
<b>Backing Thickness</b>	0,012 mm
<b>Adhesive Type</b>	modified, Dispersion Acrylic, solvent free, Transparent
<b>Total Thickness</b>	0,110 mm, (± 10%)
<b>Color</b>	Clear (00)
<b>Liner</b>	White, siliconized Paper
<b>Adhesion to Steel</b>	≥ 5,00 N/25 mm
<b>Temperature Resistance</b>	-40°C to +90°C
<b>Length</b>	50 m, Other lengths and spools upon request
<b>Width</b>	6 mm, 9 mm, 12 mm, 15 mm, 19 mm, 25 mm, 30 mm, 38 mm, 50 mm, other widths upon request
<b>Storage Life</b>	The material can be stored at room temperature for at least 12 months.
<b>Effective</b>	21 November 2022

## volzFix 9082 PV2

### Applications

- Bonding with resumption function
- Industrial process aids
- Object renovations in event technology
- Exhibition construction and carpet adhesion Object renovations

### Benefits

- Open side has permanent adhesion
- Closed side is removable

### Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 15°C to 24°C, with a relative humidity of 50% +/- 30%. When using an adhesive tape stored below 15°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
