

volzFix V5263 PV7

volzFix V5263 PV7 is a high-temperature resistant acrylate transfer adhesive with good adhesive strength and aging resistance. Due to its structure (pure adhesive film without auxiliary carrier), it is also well suited for fabrics and nonwovens, as their elasticity is not impaired.

volzFix V5263 PV7

Applications

- Finishing of sheet materials with adhesive or for the production of laminates
- Universal adhesive tape for bonding different materials

Benefits

- Good adhesion especially on smooth surfaces
- Very good shear resistance and moderate tack (initial adhesion)
- Well suited for stamped part manufacturers for self-adhesive finishing of e.g. foils

Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 15°C to 24°C, with a relative humidity of 50% +/- 30%. When using an adhesive tape stored below 15°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
