

Technical Product Data Sheet

volzFix V9065

volzFixV9065 is a double-sided adhesive tape consisting of a transparent polyester film and a modified acrylate adhesive. The tape features very good resistance to UV radiation, temperature stress, chemicals and solvents, and moisture. In addition, the shear-resistant adhesive has excellent permanent adhesion to metal, paint and other highenergy plastic surfaces, as well as good permanent adhesion to low-energy surfaces.

Nominal Values

Backing PET Film

Backing Thickness 0,012 mm

Adhesive Type | modified, Acrylic

Total Thickness 0,210 mm

Color Clear (00)

Liner bi-siliconized, PP Film

Adhesion to Steel 24,00 N/25 mm

Loop Tack 33,00 N/25 mm

Shear Strength > 400 h

Temperature Resistance 40°C to +160°C, +180°C (short-term)

Length 50 m, 500 m, other lengths upon request

Width 6 mm, 9 mm, 12 mm, 15 mm, 19 mm, 25 mm, 30 mm, 38 mm, 50 mm, 1372

mm, other widths upon request

Storage Life The material can be stored at room temperature for at least 12 months.

Effective 11 August 2021

Technical Product Data Sheet

volzFix V9065

Applications

- Bonding of car and truck exterior mirrors in plastic housings with simultaneous splinter protection
- Finishing of moldings, trim panels and cable ducts
- Splicing of paper, textile, plastic and metal foils where very high shear and adhesion strength is required

Benefits

- Very good resistance to UV radiation, temperature stress, chemicals and solvents, and moisture
- Excellent permanent adhesion to metal, paint and other high-energy plastic surfaces
- Also suitable for rough or textured surfaces due to the thicker adhesive layer

Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 19°C to 21°C, with a relative humidity of 50%. When using an adhesive tape stored below 19°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
