Applications

- Assembly of extruded and injection-moulded plastic parts such as screens, strips, cable ducts and plexiglas mirrors for interior and display applications
- Used for bonding hooks, signs, holders and dispensers
- Exhibition and shop construction

Benefits

- High adhesive and shear strength
- Good resistance to UV radiation, temperature, solvents, humidity
- Suitable for outdoor applications

Storage Conditions

The Rolls should be stored in their packaging protected from light and at a temperature between 19°C to 21°C, with a relative humidity of 50%. When using an adhesive tape stored below 19°C, it is advisable to keep the tape at room temperature for 24 hours to preserve its characteristics.
