INDUSTRIE PROFI 161-6080

Manuel Bench Dispenser for Industry and Trade

Intended for tapes up to a maximum of 100 mm* wide and a maximum outside diameter of 140 mm.

The *INDUSTRIE PROFI 161-6080* is the sturdy solution for some of your most demanding tape applications. The solid, steel construction ensures an easy process, with no slipping or lifting during use. The 161-6080 can be mounted on a table, workbench or on the wall. The uncomplicated, proven cutting system makes the 161-6080 an indispensable assistant in workshops, production facilities, logistic centers and warehouses.

The *INDUSTRIE PROFI 161-6080* can cut two different tapes of varying widths at the same time. After placing the desired length of tape on the cutting bar, the tape is cut by manually moving the blade bar either right or left, making a straight, clean cut while maintaining finger protection and keeping the blade residue-free.

The *INDUSTRIE PROFI 161-6080* is best suited for single-sided, foil, fabric, packaging, masking and crepe adhesive tapes with a core diameter of 76 mm and a maximum outside diameter of 140 mm. The dispenser can process two rolls with a width of up to 50 mm each, or one roll with a width of up to 100 mm*.

- Finger protection
- Straight, clean cut
- Sturdy, metal construction
- Solid wall or bench mount possible
- Proven, uncomplicated cutting principle with durable parts and easy maintenance
- Processes two rolls of varying width simultaneously
- Additional base plate for higher inherent weight**
